

# Animal Hair Tissue Mineral Analysis

InterClinical Laboratories Hair Tissue Mineral Analysis testing is fully accredited, and will provide the veterinarian, animal nutritionist and trainer with a sensitive indicator.

Our unique interpretive report is the best and most advanced of it's type. The Interpretive Report provides a detailed medical discussion of the test results, commenting on mineral balances, ratios, impact, disease trends, areas of concern and possible contributing factors.

The Interpretive Report also incorporates the latest developments in mineral interrelationships providing dietary and supplement recommendations based on sound nutritional principles. With nutritional therapeutics such an important part of health care the need to better assess mineral balances and individual biochemistry is more important than ever.

## Fee Schedule

**Interpretive Report \$121.00 GST incl**

### Extras

An additional fee applies for testing Boron\* \$15.00 per report

Reprint profile 2/3 report \$10.00 per report

\*Testing for boron after standard profile testing has been completed - \$40.00 per report. This may require a sample resubmittal.
