

# HAIR TISSUE MINERAL ANALYSIS IN CLINICAL PRACTICE

+

**PRACTITIONER ONLY EVENT**

## BUILD YOUR KNOWLEDGE

### Assessing Mineral Imbalances & Heavy Metal Toxicities to Unravel Chronic Conditions

This half-day Face-2-Face offers both new and experienced HTMA practitioners evidence-based, practical knowledge and the resources to build bio-individualised therapy for improved outcomes, particularly in those patients with complex chronic conditions.

HTMA provides deeper insight into patient stress, energy production, adrenal & thyroid efficiency, cognitive function and blood sugar management.

Learn how to:

- Unravel the causes of chronic health conditions
- Importance of toxic element assessment in health appraisals
- Gain key insights into your patients nutritional foundation
- Tailor therapy based bio-individual requirements
- Utilise 3 unique HTMA InterClinical Resources for improved report analysis
- Add a core functional pathology to your practice
